GEAR 6 PERFORMANCE ANNOUNCES...

SPECIAL EDITION SERIES | PULSE | SUPERFORMANCE MKIII

S P E E D ■ P O W E R ■ D R I V A B I L I T Y

Each special edition car, identically built under the expertise & direction of Gear 6 Performance, retails for \$85,900.00.

Designed for the driver who wants performance and power found in some of today's best modern cars. The focus; perfecting the driving experience for those who love smooth acceleration and control with built-in soundness. The Gear 6 Performance MKIII build-out has acquired a reputation for perfection and performance by our customers, earning a '2010 Superformance Dealer of the Year' recognition for excellence and customer support.

Inspiration for this project came from Superformance MKIII SPO 2875, which was to be my own personal car and Demo car for Gear 6 Performance. Before the car was finished, we were contacted by Cesar Fuentes, of Juarez Mexico, with 26 years of competition in Road Racing, Off Road Racing, and Sprint Cars, who after flying out to visit us, wanted to purchase it. After several upgrades and modifications requested by Mr. Fuentes the car has turned out to be one of the fastest accelerating, best cornering, quickest braking, smoothest driving vehicles I've personally ever driven. It is an absolute pleasure to drive and just down-right fun. It's also show-quality and beautiful to look at. Cesar commented "You don't drive this car, it asks you what you want it to do, you tell it.. and it does it". Cesar has not only driven his car on the street, he's raced it at Arroyo Seco in New Mexico, where after 8 laps of a 10-lap SCCA event, he had lapped the entire field of the fastest category of professional drivers. It's with the help and advice from our customers like Cesar and others that we've come up with a Special Edition Series built exactly alike, based 95% on SPO 2875, with the only option.. a choice of four colors.

This Gear 6 Special Edition car will be easily recognized by the special build which includes a 520 HP fully polished Roush 427 with Roush Pent Roof Valve Covers, TKO 600 Road Race Transmission, Big Brakes, Racing Suspension, Power Steering, Fully Polished 17" Wheels with Kumho Tires, Shoulder Harnesses, Fire Extinguisher and lots of other goodies. It will be available in four distinct colors, a Gear 6 Logo on each fender, a Gear 6 Custom Shifter, Gear 6 Custom Alternator Bracket, and a special dedication tag on the front frame rail showing who the car was built for and the designated MKIII's sequence number.

These four gorgeous color choices are available..

Monza Red w/ Dark Silver Twin Stripes/ Black Pin Stripe

Dark Silver w/ Silver Twin Stripes/ Red Pin Stripe

Royal Blue w/ Wimbledon White Twin Stripes/ Red Pin Stripe

Black w/ Dark Silver Twin Stripes/ Red Pin Stripe
